## Drum Drier

### Application:

Calcite  
Dolomite  
Quartz  
Feldspar  
Refractory materials  
Metallic minerals and ores  
Clay

### Performance:

Feedsize up to 50 ~ 100mm  
Capacity 5 to 30 t/h  
Water evaporation up to 3.000 kg/h

### Features:

Most common drying method in the mineral industry  
Rotating drying drum with hot air flow  
Product transport and revolution forced by internal vanes  
Drying drum available in various design, depending on diameter:  
- one-way design  
- two-way design  
- three-way design  
Heating by oil or gas
